My name is Gintara Nandiwardhana. I have graduated from Universitas Gadjah Mada majoring Electrical Engineering with minor in Signal Processing. During my study, I'm active in several organizations and event committees. With my organization's experiences, I become a person who is able to work in a team or individually, improve my communicating skills, and to easily adapt in the job.

I have work experience as IT Staff at PDAM Kendal, lab work assistant, internship at PT Astra Daihatsu, and many committees. With this experience, I learnt about different work environment in different places. By learning and having more experiences, I will ready to be part of a great team and fully contribute to make a better team.

After I graduated, I did project with my professor about developing an application which contains education and video game with plastic waste issue. I have been learning about data science, big data, API development, and create some self-initiated project to improve my skill. I also had a project to create a web for a company.

Within 5 years my target is to be a part of a team in a company and improve with the skill I have for my career path, I will get in many ways, such as from training, coaching, and ask to senior if I don't understand. I will contribute to the company with the skills I have, be a volunteer to create better company.

This is a short resume about me. I'm sure this resume has not described me much, so if given the opportunity, I will explain more directly.
